## ABOUT AIM'S GLOBALEADER™ ASSESSMENT

*I wanted to let you know that I found AIM's GlobalLeader™ assessment to be very informative. Interestingly, having not seen the outputs prior to participating in the assessment, I found that those items I had indicated as something I would like to see included in the output were there. The outputs are informative and the recommendations for action planning are well organized and easy to execute against.*

*Having spent the better part of my career as a learning and development person, I was not surprised that my highest dimensions are Communi-Leadership and Edu-Leadership with Collabo-Leadership and Diversa-Leadership close seconds.*

*This is a great tool for organizations who are truly looking to strengthen the global leadership capabilities of their managers as well as those employees who are in global project leader positions.*
